Notice of Allowance

This is the Notice of Allowance for application number 10/777,464 Reinforced Rod Holder, filed on 2/11/04. Claims 15-18 are allowed.

Reasons for Allowance

The following is an examiner's statement of reasons for allowance:

With regards to claim 15, the prior art does not teach at least one fastener boss receptive to a fastener bolt inserted through a slotted aperture in the backing plate.

Although the term "receptive to a fastener bolt" was considered as a functional statement only and not a positive limitation, the Rupp and Potter, Jr. references as combined are not capable of accepting a fastener through an aperture in the backing plate, the acceptance of the bolt into the boss, which would fixedly attach the backing plate and the upper flange to each other in a manner that would not allow the elements to rotate relative to each other. Modifying the device as such would destroy the intended purpose of the device.

With regards to claim 18, removing a fastener to remove the upper flange without disturbing the receiving socket is not possible since the receiving socket, which is attached to the backing plate, is suspended by the upper flange, so the removal of the upper flange will inherently disturb the receiving socket.
